Objective:

- Seeking to join this position as a Data Analyst to leverage my data analysis skills in extracting actionable insights, transforming raw data into meaningful information, and supporting data-driven decision-making to improve performance and optimize business operations, while continuously developing my technical and analytical capabilities.

Education:

- study at Menoufia National University 2024 - 2028
- Faculty Of Computer and Artificial Intelligence

Skills:

- Strong command of computer applications and operating systems (Windows, MS Word, Excel).
- Proficient in data analysis using Excel for data cleaning, analysis, and reporting.
- Solid problem-solving and analytical thinking skills.
- Basic knowledge of Python and data querying concepts.
- Familiarity with Python and Java and PHP fundamentals.
- Ability to communicate insights clearly through written and verbal communication.
- Attention to detail with the ability to work accurately under pressure.

Technical skills:

Backend Development:

- Understanding of server-side development concepts and RESTful APIs.
- Experience with backend logic, data handling, and database integration.

Programming Languages:

- Python for data analysis, scripting, and backend development.
- Java for object-oriented programming and backend fundamentals.
- PHP for web backend development and database-driven applications

Data Analysis:

- Ability to extract insights and support data-driven decision-making
- Data cleaning, processing, and analysis using Python and Excel.

LANGUAGE SKILLS:

- Arabic - Native
- English - intermediate
